## Condor Flugdienst

True to its motto "Born to fly" Condor Flugdienst is the airline of choice for some 6 million passengers every year. Started as a leisure airline in 1956, Condor has in the meantime extended its business model to include charter and schedule flights and serves 75 destinations worldwide. The cooperation with well-known interline partners and distribution through various sales channels – including Internet, travel agencies and tour operators – have led to continuous success as well as new challenges.

## ISO Software Systeme

Since more than 30 years, ISO Software Systeme is specialized in made-to-fit solutions for the aviation industry. As a IATA Strategic Partner and Preferred Partner of Condor Flugdienst, ISO offers applications and services according to proven standards. More than 30 clients worldwide already rely on quality software made in Germany.

## Needs

To meet the challenges of three sales channels and worldwide interline partners, Condor needed

- the possibility to calculate all applicable taxes just-in-time, for both sales and interline audit
- a solution to handle all currencies based on various rates, IATA rates as well as bank rates
- the option to tie these functionalities to any application within the company

## Solution

Condor chose ISO's highly automated solutions

- SKYfly Tax – IATA TTBS/RATD-compliant tax module to properly compute taxes, pre-sale and post-sale
- SKYfly Currency – currency conversion module for IATA FDR and MMR as well as Daily Bank Rates (e.g., from EZB or Bank of Canada)
- Web services for both modules to connect to any application

## Benefit

With SKYfly Tax & Currency Condor gained sustainable advantages

- swift and reliable calculation of taxes ensures correct values at any time
- centralized data processing reduces maintenance effort and avoids inconsistencies
- high level of automation reduces workload and costs
